Laboratory Test Catalog - Complete and Easier to Find

The UCH Clinical Laboratory Test Catalog has become more accessible. Instead of taking five “clicks” to access via the HUB, it now takes only two:

From the HUB (<http://hub.uch.edu/>), click **Clinicians** in the upper right, and then select **Clinical Lab - Test Catalog** from the list.

Type the first few letters of the test you are looking for in the Search field. A list of items containing those letters will appear. Click on the one you need to view specimen collection and transport requirements.

There is also a list of links to general specimen collection information on the right side of the catalog page.

Use of the web-based test catalog eliminates wait times and misunderstandings that may occur when inquiring by telephone. The Clinical Laboratory encourages you to save time and aggravation by clicking twice from the HUB.

Issued June 11, 2012
