The purpose of the University of Colorado Hospital Nursing Career Map is to identify various professional growth opportunities at UCH. Specific roles, departments and general areas of interest are depicted on flags on the map. Your supervisor, educator, charge nurse or clinical coordinator can assist you in learning more about these areas.

Research demonstrates engaged employees experience higher job satisfaction. You are encouraged to take advantage of the many directions to further your career while contributing to UCH’s mission to improve lives.

Examples of educational course offerings listed below support the respective Magnet Model Components on the Nursing Career Map.

Please be sure to check the HUB, under Training and Education, for current course information. (revised November 2013)
