OVERVIEW

In 2010, the number of nonelderly, uninsured in America reached 49.1 million in the United States. Between 2008 and 2010, the uninsured rate among the nonelderly adults and children increased by 4.9 million. The recession that started in 2008 and continues to this day contributed to this sharp increase. During this time, many people were laid off, losing their health insurance as well as their source of income. As a result, more than one in five adults under the age of 65 was uninsured in 2010.¹

As health insurance costs rise for employers, many of them are dropping coverage altogether, resulting in only 56% of the nonelderly population being covered by employer-sponsored coverage. Many businesses that continue to offer health insurance raised their worker's share of premium to an average annual 28% in 2011, making health care more expensive for those who have insurance.²

For those who recently lost coverage, Medicaid and the Child Health Insurance Program (CHIP) help fill the gap, and have been crucial in providing health care to children during the recession. However, income eligibility for adults wanting to qualify for Medicaid is much more limited. The Affordable Care Act (ACA) is designed to extend Medicaid eligibility to almost all people with incomes at or below 138% of poverty.³

USE OF PREVENTIVE SERVICES BY INSURANCE STATUS

Many of those who are uninsured do not obtain necessary preventive services, leading to more advanced disease and worse outcomes by the time they do obtain health services. The following chart shows the percent difference between the uninsured and insured in obtaining preventive care.⁴

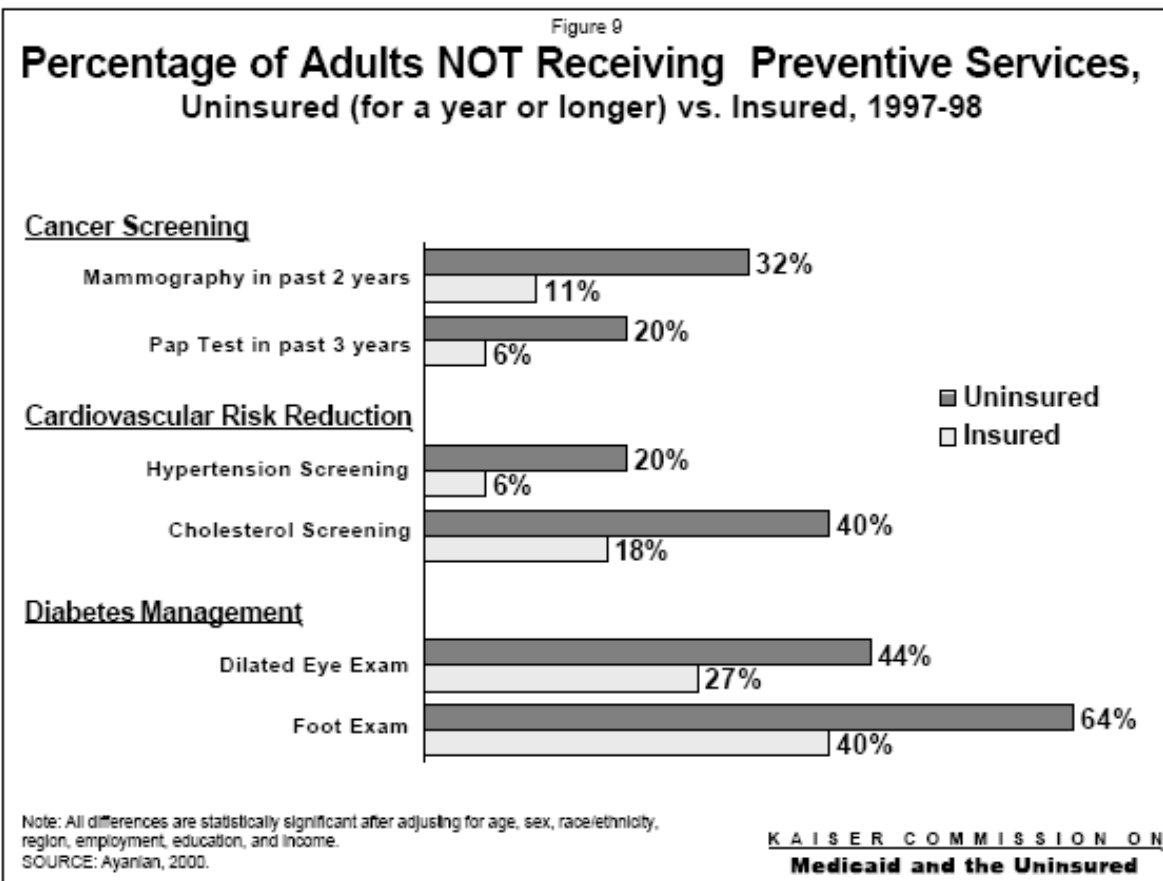

Figure 1 Percentage of Adults NOT Receiving Preventive Services⁵

⁴ Kaiser Commission on Medicaid and the Uninsured, Kaiser Family Foundation.
<http://www.kff.org/uninsured/upload/Briefing-Charts.pdf>

⁵ Ibid.

DISEASE ADVANCEMENT BY INSURANCE STATUS

The next chart compares the advancement of disease, breast cancer in particular, between the uninsured and the insured. It also shows the higher relative risk of death for the uninsured. Having health insurance is estimated to reduce mortality rates by 10-15%.⁶

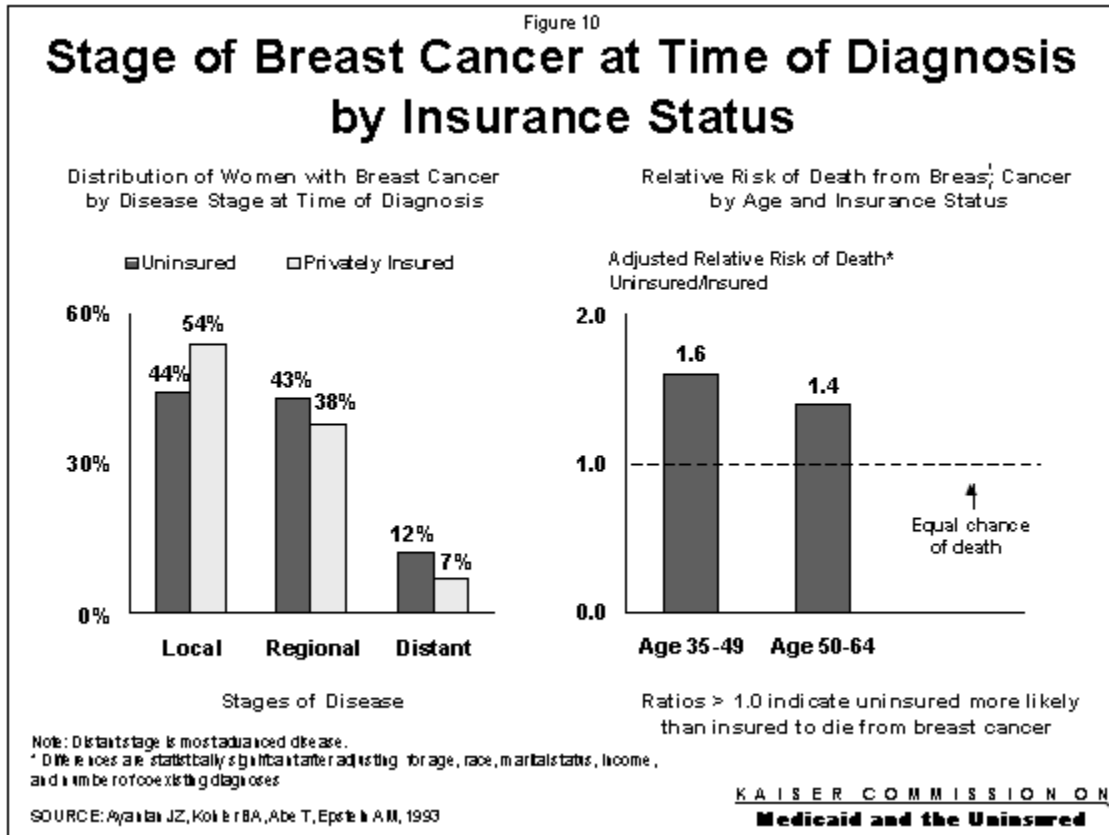

Figure 2 Stage of Breast Cancer at Time of Diagnosis by Insurance Status⁷

⁶ Kaiser Commission on Medicaid and the Uninsured, Kaiser Family Foundation. <http://www.kff.org/uninsured/upload/Briefing-Charts.pdf>

⁶ Ibid.

BARRIERS TO HEALTH CARE BY INSURANCE STATUS

Lack of insurance can adversely affect a person's physical health because it frequently hinders a person's ability or desire to get needed help. The following chart shows the many ways that the high cost of health care prohibits receiving medical attention, especially for the uninsured. Even if all health care is purchased by self-payment, catastrophic illnesses can have devastating effects on a person's financial stability.⁸

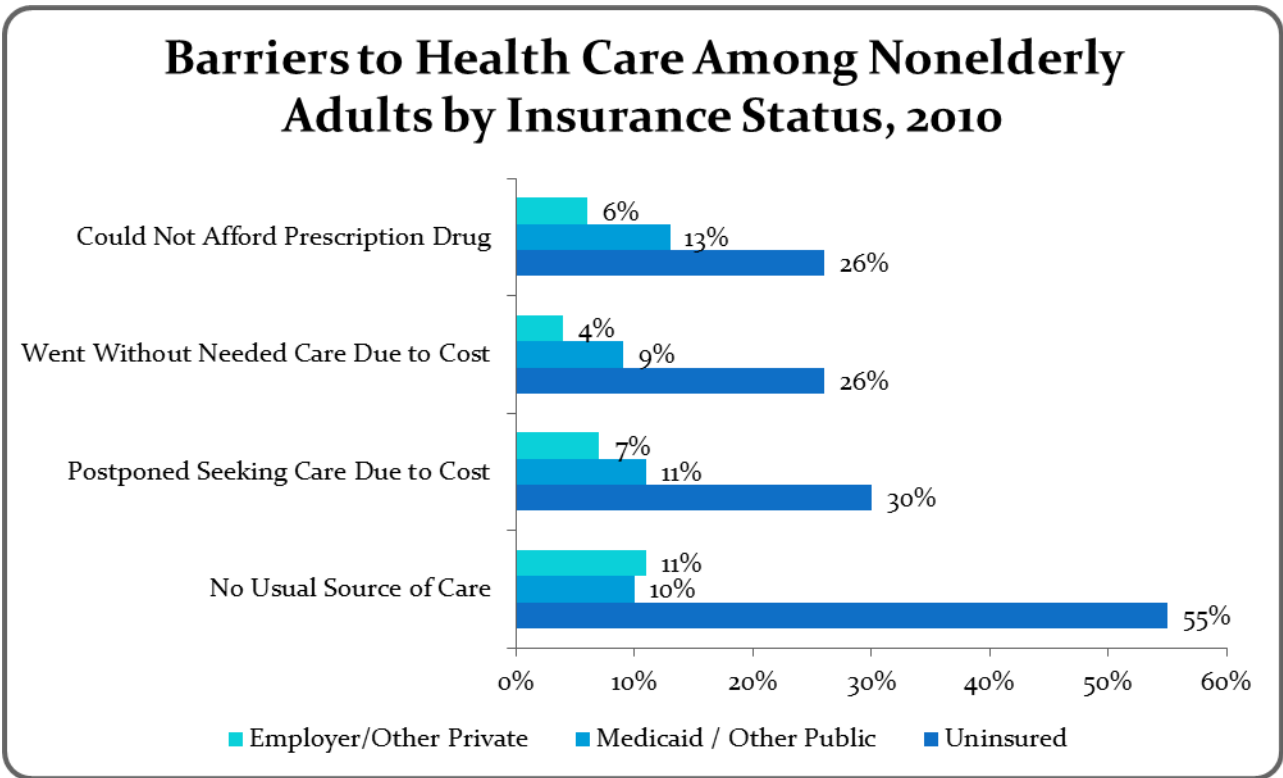

Figure 3 Barriers to Health Care Among Nonelderly Adults by Insurance Status, 2010⁹

⁸ Kaiser Commission on Medicaid and the Uninsured, Kaiser Family Foundation. <http://www.kff.org/uninsured/upload/1420-13.pdf>

⁹ Chart Source: KCMU analysis of 2010 NHIS data. Note: In past 12 months. All differences between the uninsured and the two insurance groups are statistically significant ($p < 0.05$). Respondents who said their usual source of care was the emergency room were included among those not having a usual source of care.

HEALTH INSURANCE

BRFSS Survey Question: Do you have any kind of health care coverage?

The chart shows the percentage of people who have any kind of health insurance. Counties reporting higher incomes, such as Douglas and Arapahoe Counties, typically have higher percentages of insured residents. Denver and Adams Counties have the lowest percentage of people carrying health insurance. The Healthy People 2020 goal is for all people to have some type of health insurance.

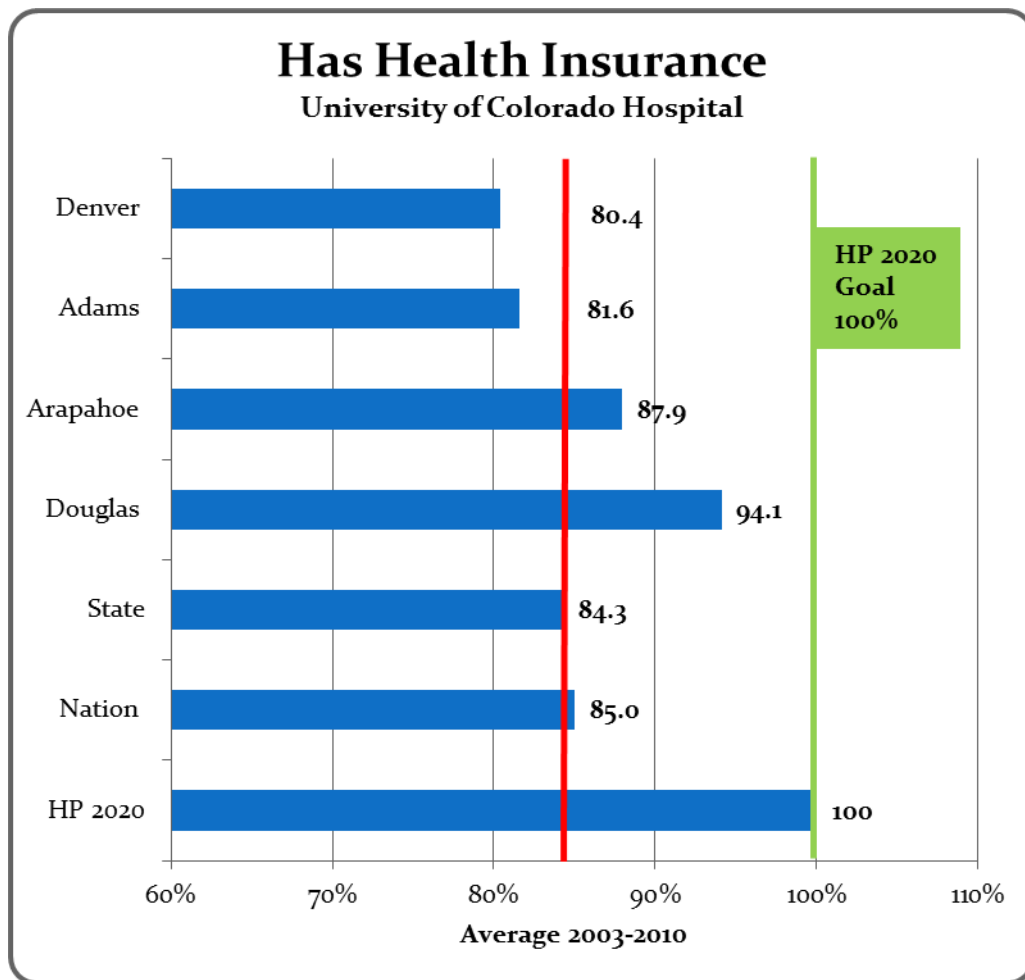

Figure 4 Has Health Insurance¹⁰

¹⁰Chart Source: Behavioral Risk Factor Surveillance System, Colorado Department of Public Health and Environment, Average 2003, 2005, 2007, 2010. National 2010.

DEMOGRAPHICS

Insurance coverage increases with age because Medicare provides coverage for those over 65 years of age. Many young people do not have insurance coverage, either due to choice, lack of insurance through employment, or unemployment.

Figure 5 Any Insurance Coverage by Age¹¹

Females are more likely to have insurance coverage than males. People who have never married are least likely to have insurance while those who are married are significantly more likely to have health insurance.

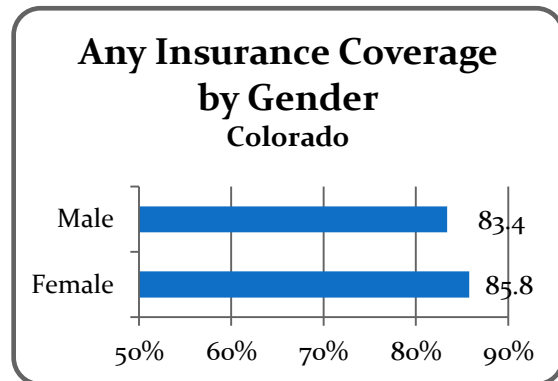

Figure 6 Any Insurance Coverage by Gender¹²

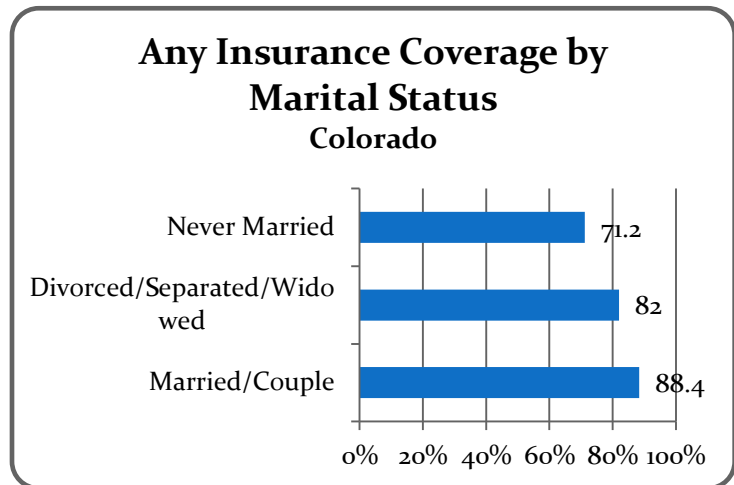

Figure 7 Any Insurance Coverage by Marital Status¹³

¹¹ Chart Source: Behavioral Risk Factor Surveillance System, Colorado Department of Public Health and Environment, Average 2003, 2005, 2007, 2010.

¹² Ibid.

¹³ Ibid.

Insurance coverage is the lowest for those of Hispanic ethnicity. Those of White race are most likely to have health insurance.

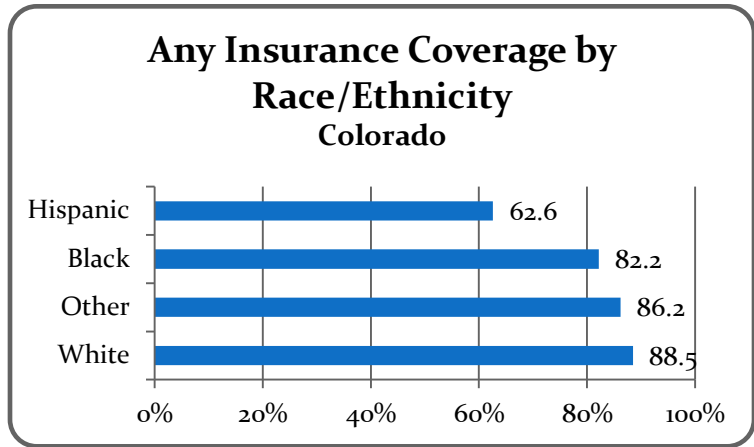

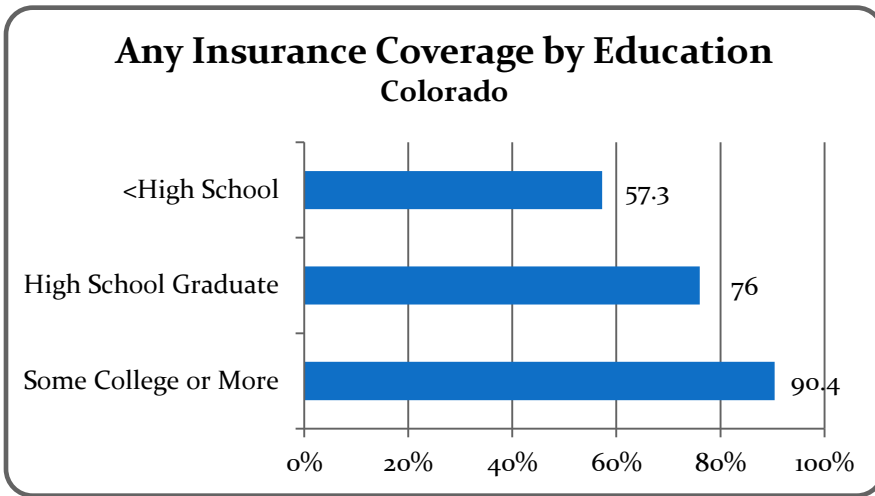

Figure 8 Any Insurance Coverage by Race/Ethnicity¹⁴

Insurance coverage significantly increases for people with higher education and incomes, partly reflecting the coverage that comes with employment.

Figure 9 Any Insurance Coverage by Education¹⁵

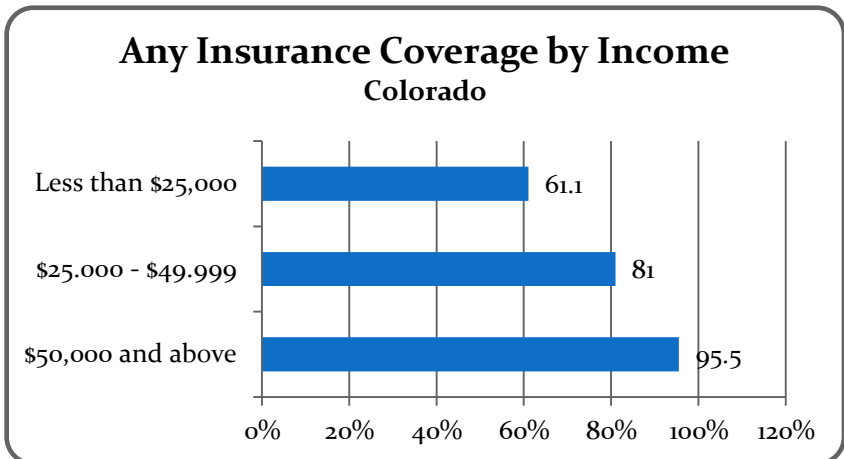

Figure 10 Any Insurance Coverage by Income¹⁶

ELIGIBLE BUT NOT ENROLLED

ELIGIBLE ADULTS NOT ENROLLED IN MEDICAID

Medicaid is a publicly financed health insurance program for low-income children, parents of dependent children, adults 65 and over, and individuals with disabilities in Colorado. Adams County has the highest number of eligible adults who are not enrolled in Medicaid. Denver and Arapahoe Counties are close to the state average for residents who are eligible but not enrolled. Douglas County has considerably less eligible adults not enrolled in Medicaid.

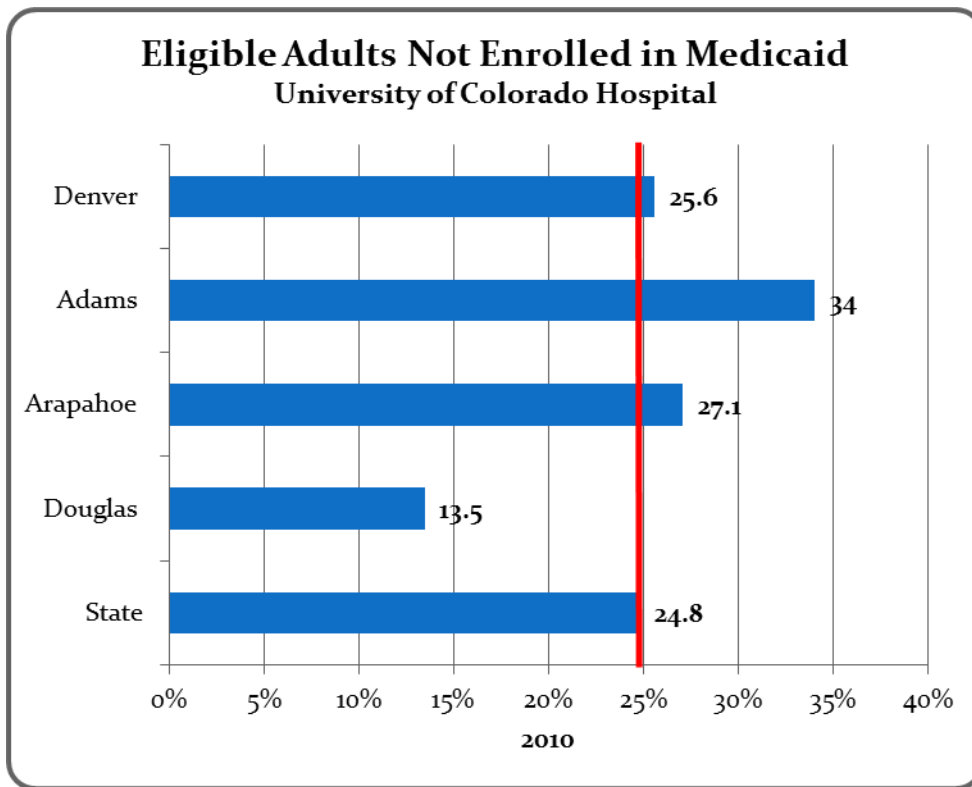

Figure 11 Eligible Adults Not Enrolled in Medicaid¹⁷

¹⁶ Ibid.

¹⁷ Chart Source: Enrollment data from Colorado Department of Health Care Policy and Financing. Uninsured estimates from CHI analyses of 2008 and 2009 American Community Surveys. Adults 19-64 years of age.

ELIGIBLE CHILDREN NOT ENROLLED IN MEDICAID

The following chart is an estimate of uninsured children who are eligible but not enrolled in Medicaid. Most of the counties are below the state average for eligible children not enrolled, while Adams County is close to the state average.

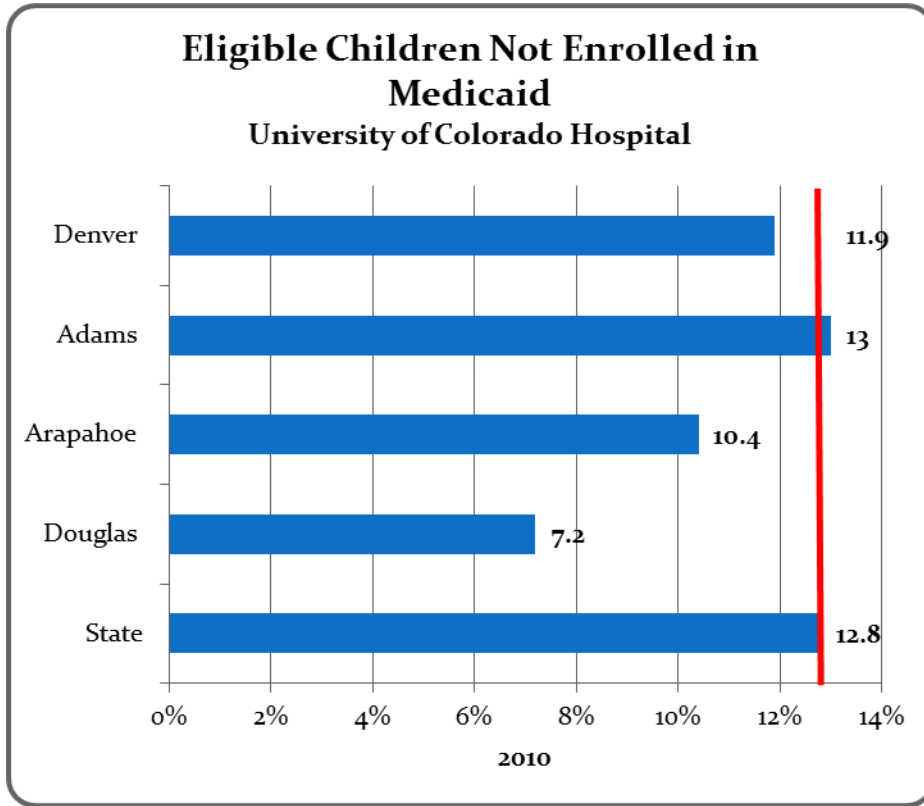

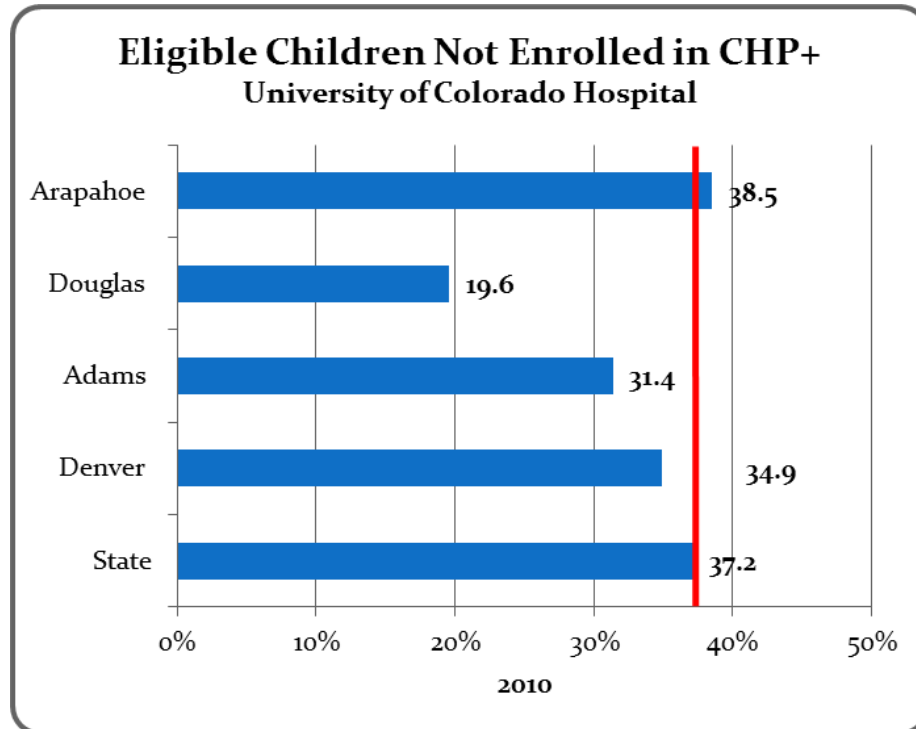

Figure 12 Eligible Children Not Enrolled in Medicaid¹⁸

¹⁸ Chart Source: Enrollment data from Colorado Department of Health Care Policy and Financing. Uninsured estimates from CHI analyses of 2008 and 2009 American Community Surveys. National data measured differently and therefore not comparable.

ELIGIBLE CHILDREN NOT ENROLLED IN CHP+

The Child Health Plan Plus (CHP+) program offers low cost health insurance for Colorado's uninsured children who come from families who earn or own too much to qualify for Medicaid, but cannot afford private insurance. Estimates of uninsured children ages 18 and under who are eligible but not enrolled in the CHP+ program is shown in the nearby chart. Arapahoe County is close to the state average of eligible children not enrolled in CHP+.

= Figure 13 Eligible Children Not Enrolled in CHP+¹⁹Adults not enrolled in Medicaid

¹⁹ Chart Source: Enrollment data from Colorado Department of Health Care Policy and Financing. Uninsured estimates from CHI analyses of 2008 and 2009 American Community Surveys. National data measured differently and therefore not comparable.

INTERVENTIONS

The following list of programs and resources are available in Colorado for children, pregnant women, Americans over age 65, the disabled, and people with health conditions that are uninsurable. Other people can utilize these resources if they meet specific program guidelines. The web links can be accessed through the web site in the footnote.²⁰

“[Benefits Check-Up](#) – BenefitsCheckUp is a free online service that helps thousands of people every day to connect to government programs that can help them pay for prescription drugs, health care, utilities, and other needs.

[Colorado Access](#) - A nonprofit health plan that provides healthcare coverage for low-income people and people with disabilities in Colorado. If you receive Medicaid, you can choose Access Health Plan as your health plan.

[Colorado Health Plan Plus \(CHP+\)](#) - low-cost health insurance program for uninsured Colorado children ages 18 and under whose families earn or own too much to qualify for Medicaid but cannot afford private insurance. CHP+ also offers benefits to pregnant women and new borns. The CHP+ prenatal care program offers free health insurance to uninsured Colorado pregnant women who live in households that meet certain income requirements.

[Colorado Guide to Free and Low Cost Health Care for Pregnant Women](#) – pdf formatted document. The Piton Foundation compiled The Colorado Guide to Free and Low-Cost Health Care for Pregnant Women and Children to let uninsured families know what health care options are available to them. [List of providers by county](#).

[Colorado Indigent Care Program](#) – state program that provides partial reimbursement to providers for offering medical care to eligible underinsured and uninsured residents. This is **not** a health insurance program. Services are restricted to participating hospitals and clinics throughout the state. To qualify, you must have income and resources combined at or below 185% of the Federal Poverty Level (FPL), and cannot be eligible for Medicaid. See site for more details.

[CoverColorado](#) – non-profit entity created by the Colorado Legislature to provide medical insurance for eligible Colorado residents who, because of a pre-existing medical condition, are unable to get coverage from private insurers. In addition, CoverColorado also serves as the state’s plan for individuals who are eligible under the Health Insurance Portability and Accountability Act, otherwise known as HIPAA.

²⁰ <http://www.coloradohealthinsurancebrokers.com/public-private-assistance-resources/>

[Getting Us Covered](#) - Introduced in 2010, this temporary coverage is available to US citizens who have been uninsured for 6 months or more AND were denied coverage because of a pre-existing condition. There may be as many as 4,000 people in Colorado that are eligible for this federally sponsored program. Getting Us Covered is run by CoverColorado, Colorado's high risk insurance pool.

[Joblessguide.net](#) - This web site was launched by a group of local Colorado residents to help others in the region face challenges due to a loss of a job or other economic difficulties because of the faltering local and national economy. This unique website provides a wealth of information aimed at reducing the hardships that many people in Colorado face.

[Medicaid General Information](#) - Medicaid is a health care program for low income Coloradans. Applicants must meet eligibility criteria for one of the Medicaid Program categories in order to qualify for benefits. Major program categories include Aid to Families with Dependent Children/Medicaid Only, Colorado Works/TANF (Temporary Assistance for Needy Families), Baby Care/Kids Care, Aid to the Needy Disabled, Aid to the Blind, and Old Age Pension. To apply for Medicaid, contact your local County Departments of Social/Human Services.

[Medicaid Eligibility for Families and Children](#) - clients must meet financial, medical, and program criteria to access waived services. The applicant's income must be less than \$1,635 (300%, or three times the monthly standard maintenance allowance) per month and countable resources less than \$2,000. The applicant must also be at risk of institutional placement in a nursing facility, hospital, or ICF/MR (intermediate care facility for the mentally retarded). See site for more details

[Medicaid Eligibility for Long Term Care for the Elderly, Blind, and Disabled](#) - the resource limit is \$2000 for an individual. The home, a vehicle, a burial fund and household and personal goods worth \$2000 are exempt. For further information about countable and exempt resources, refer to Section 8.110.51. If the applicant is married, and his/her spouse is not in a nursing facility or not on Medicaid, spousal protection rules apply. See site for more details.

[Medicaid Disability Determination Information](#) - applications and other resources

[Medicaid Federal Site](#) - has some useful information and also a handy list of [Colorado's Medicaid office address and phone numbers](#)

[Medicare](#) - Medicare Part A (Hospital Insurance) helps cover your inpatient care in hospitals, including critical access hospitals, and skilled nursing facilities (not custodial or long-term care). It also helps cover hospice care and some home health care. You must meet certain conditions. Most people don't have to pay a monthly payment, called a premium, for Part A. This is because they or a spouse paid Medicare

taxes while they were working. Medicare Part B (Medical Insurance) helps cover your doctors' services and outpatient hospital care. It also covers some other medical services that Part A doesn't cover, such as some of the services of physical and occupational therapists, and some home health care. You pay the Medicare Part B premium each month* (\$ 66.60 in 2004). In some cases, this amount may be higher if you didn't sign up for Part B when you first became eligible. The cost of Part B may go up 10% for each 12-month period that you could have had Part B but didn't sign up for it, except in special cases. You will have to pay this extra amount as long as you have Part B.

[Medicare Prescription Part D Drug Plans](#) – resources to help you find the right Medicare prescription plan for your needs. You might also want to use the [Medicare Rx plan finder](#) web based tool.

[Medicare Rights Center](#) – resource to help weave your way through the Medicare maze.

[Prescription Drug Assistance](#) – get financial assistance for prescription drugs through the Partnership for Prescription Assistance. PPA has links to over 475 assistance programs and 150 pharmaceutical company programs.

[Retirement Benefits Calculator](#) - great resource to help you plan for your golden years.

[Rx Outreach](#) – plan to help middle class and low income Coloradans with the increasing costs of prescription drugs

[Social Security](#) – government web site that is quite a nice resource and easy to use.

[Social Security Benefits Screening Tool](#) - see what programs you might qualify for.

[Social Security Benefits for the Disabled](#) – explains what benefits are available, how you can qualify, and who can receive benefits on your earnings record.

[Uninsured Americans Report: Sicker and Poorer](#) - report on the Consequences of Being Uninsured.

[Veterans](#) – application for Veteran's benefits.

[WIC](#) - special Supplemental Nutrition Program for Women, Infants and Children²¹
